1 Getting started

iGO Navigation app is optimised for in-car or pedestrian use. You can use it easily by tapping the screen buttons and the map with your fingertips.

Free Map updates

You can download updated maps for your navigation system for free throughout the lifetime of the product.

1.1 Initial set-up

When using the navigation software for the first time, an initial set-up process starts automatically.

1. You are now asked whether you allow the software to collect usage information and GPS logs that may be used for improving the application and the quality of maps. Tap Yes to allow the anonymous statistics or disable this function. Later you can turn them on or off individually in Usage report settings (page 94).

2. The Configuration Wizard starts. Tap Next to continue.

3. Select the language and speaker used for voice guidance messages. Later you can change it in Regional settings (page 87). Tap Next to continue.
4. If needed, modify the time format and unit settings. Later you can change them in Regional settings (page 92). Tap to continue.

5. If needed, modify the default route planning options. Later you can change them in Route Preferences (page 85). Tap to continue.

6. Please read the Content Download Notice about the terms of purchasing and downloading map content for navigation. Tap to continue.

7. Please read the Trial Package Notice about the terms of using trial versions of navigation content packages. Tap to continue.
8. The initial set-up is now complete, tap Finish.

10. At the end of the set-up process, you are reminded that the application does not contain any maps yet. To get the maps that you are entitled to download for free, or to purchase further content, tap Yes. This will take you to the in-app Shop. For instructions on using the Shop, continue with the next chapter in this guide.

1.2 Downloading new maps and other content

Perform the following steps to download free or pay maps or other navigation-related content to your phone, including:

- New map packages
- Map updates
- Online service subscriptions
- Places of interest, 3D buildings, and other extras.

1. In the Navigation menu, tap and .
2. Select the required item and tap \textit{or the price of the item.}

\begin{center}
\includegraphics[width=0.4\textwidth]{image1}
\end{center}

\textbf{Note!} Items that you have already purchased and have not yet downloaded to your phone, also appear in the list. Tap \textit{any time to download them to your phone.}

3. For most content packages, you can further select individual items to download (for example, you can select specific country maps within a continent or region.)

\begin{center}
\includegraphics[width=0.4\textwidth]{image2}
\end{center}

Tap all items that you need, and then tap \textit{to continue. The download process starts.}

\begin{center}
\includegraphics[width=0.4\textwidth]{image3}
\end{center}

4. After the download is completed, tap \textit{to continue.
5. To complete the installation, the application has to be restarted. Tap OK in the message box.

Tip! You can delete a map from your device if you are not going to use it for a while and want to free up some space. Deleted maps can be downloaded again from the Shop any time. To delete an installed map, tap its name in the Shop, then select Proceed. Alternatively, to delete an entire package in the Shop, do as follows: tap ^, then Details, then again, tap ^ and finally, tap Remove Content.

1.3 Screen controls
The following sections describe the functionality and use of buttons, sliders, and other screen controls in iGO Navigation app.

1.3.1 Using the buttons and other controls
To operate iGO Navigation app, tap the buttons on the touch screen.

<table>
<thead>
<tr>
<th>Type</th>
<th>Example</th>
<th>Description</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Button</td>
<td><img src="image" alt="New Route" /></td>
<td>Opens a new screen where you can set a parameter.</td>
<td>Tap it once.</td>
</tr>
<tr>
<td>Button with value</td>
<td>Viewpoint Normal</td>
<td>Displays the current value of a field or setting where the value can be changed. After the change, the new value is shown on the button.</td>
<td>Tap it once.</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>Icon</td>
<td><img src="image" alt="Icon" /></td>
<td>Provides additional information, for example traffic summary or itinerary.</td>
<td>Tap it once to open a screen with additional information or options.</td>
</tr>
<tr>
<td>List</td>
<td><img src="image" alt="List" /></td>
<td>Shows multiple options.</td>
<td>Grab the list anywhere and slide your finger up or down. Depending on the speed of sliding, the list scrolls fast or slow, only a bit or till the end.</td>
</tr>
<tr>
<td>Switch</td>
<td><img src="image" alt="Switch" /></td>
<td>Shows whether a feature is enabled when there are only two choices.</td>
<td>Tap it to turn the switch on or off.</td>
</tr>
<tr>
<td>Slider</td>
<td><img src="image" alt="Slider" /></td>
<td>When a feature can be set to different values in a range, iGO Navigation app shows an indicator on a gauge that displays and sets the value.</td>
<td>Drag the handle to move the slider to its new position. Tap the slider where you want the handle to appear.</td>
</tr>
<tr>
<td>Virtual keyboard</td>
<td><img src="image" alt="Virtual keyboard" /></td>
<td>Used to enter text and numbers.</td>
<td>Each key is a touch screen button.</td>
</tr>
</tbody>
</table>
The Navigation menu may contain several menu items on one or more pages.

You need to confirm selections or changes only if the application needs to be restarted, if it needs to perform a major reconfiguration, or if you are about to lose some of your data or settings. Otherwise, iGO Navigation app saves your selections and applies the new settings without confirmation as soon as you use the controls.

1.3.2 Using the cursor

You can select a map location in the following ways:

- By tapping the map when navigating
- By tapping the map when you are asked to confirm the destination at the end of a search.

When a map location is selected, the cursor (○) appears at the selected point on the map.

The location of the cursor can be used as the destination of the route or a new Alert Point. You can also search for Places around it or add this location to your saved locations.

You can also select some of the objects on the map. If you tap the map at the icon of a Place or traffic event, the object is selected, and you can get information about this object or use it as a route point.

1.3.3 Using the keyboard

You can type with your fingertips on the screen keyboards and you can switch between various keyboard layouts, for example English, Greek or numerical. Only those keyboard buttons are active that can be used to type a name that is available on the map. The other keys are greyed out.

<table>
<thead>
<tr>
<th>Action</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Switching to another keyboard layout, for example from an English keyboard to a Greek keyboard</td>
<td>Tap [image] and select the new keyboard layout from the list.</td>
</tr>
<tr>
<td>Correcting your entry on the keyboard</td>
<td>Tap [x] to remove the unnecessary character(s). Tap and hold the button to delete several characters or the entire input string.</td>
</tr>
<tr>
<td>---------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Entering a space, for example between a first name and a family name or in multi-word street names</td>
<td>Tap the [Space] button at the bottom centre of the screen.</td>
</tr>
<tr>
<td>Entering upper and lower case letters</td>
<td>By default, when entering a text, the first character appears in upper case while the rest of the text is in lower case. Tap [↑] to enter an upper case letter or tap it twice to turn on Caps Lock. Tap again to use lower case letters.</td>
</tr>
<tr>
<td>Entering numbers and symbols</td>
<td>Tap [123] to switch to a keyboard offering numbers and symbols.</td>
</tr>
<tr>
<td>Finalising the keyboard entry</td>
<td>Tap [✓]</td>
</tr>
<tr>
<td>Starting a search for a keyboard entry</td>
<td>Tap [🔍]</td>
</tr>
<tr>
<td>Hiding the keyboard</td>
<td>Tap [keyboard]</td>
</tr>
</tbody>
</table>
1.3.4 Using touch gestures

You usually need to tap the screen only once. However, some useful features can be accessed with other gestures. See the table below.

<table>
<thead>
<tr>
<th>Action</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tapping and holding the screen</td>
<td>Tap and keep pressing the following buttons to reach extra functions:</td>
</tr>
<tr>
<td></td>
<td>• Tap and hold the following button on list and menu screens to</td>
</tr>
<tr>
<td></td>
<td>show the Navigation view:</td>
</tr>
<tr>
<td></td>
<td>• Tap and hold any of the following buttons on the Navigation view to</td>
</tr>
<tr>
<td></td>
<td>rotate, tilt, or scale the map continuously:</td>
</tr>
<tr>
<td></td>
<td>• Tap and hold the following button on keyboard screens to quickly</td>
</tr>
<tr>
<td></td>
<td>delete several characters:</td>
</tr>
<tr>
<td>Dragging</td>
<td>Drag the screen in the following cases:</td>
</tr>
<tr>
<td></td>
<td>• To move the handle on a slider.</td>
</tr>
<tr>
<td></td>
<td>• To scroll a list: grab the list anywhere and slide your finger up or</td>
</tr>
<tr>
<td></td>
<td>down. Depending on the speed of the sliding, the list scrolls faster or</td>
</tr>
<tr>
<td></td>
<td>slower, only a bit or till the end.</td>
</tr>
<tr>
<td></td>
<td>• To move the map in map browsing mode: grab the map, and move it in the</td>
</tr>
<tr>
<td></td>
<td>desired direction.</td>
</tr>
<tr>
<td>Using pinch zoom</td>
<td>Use pinch zoom on the Navigation view to zoom in and out by moving two</td>
</tr>
<tr>
<td></td>
<td>fingers in a pinch gesture.</td>
</tr>
</tbody>
</table>
1.3.5 Manipulating the map

If you tap the map anywhere during navigation, the map stops following the current position (the blue arrow is not locked in a fixed position on the screen anymore) and control buttons appear to help you modify the map view.

You can perform the following actions on the map:

<table>
<thead>
<tr>
<th>Action</th>
<th>Button(s)</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Checking location information</td>
<td>No buttons</td>
<td>The top section of the Navigation view shows information about the selected point (the cursor).</td>
</tr>
<tr>
<td>Moving the map by dragging</td>
<td>No buttons</td>
<td>Move the map in any direction: tap and hold the map and move your finger towards the direction you want to move the map.</td>
</tr>
<tr>
<td>Zooming in and out</td>
<td>📹, 📹</td>
<td>Change how much of the map is displayed on the screen.</td>
</tr>
</tbody>
</table>

iGO Navigation app uses maps that let you examine the locations at various zoom levels, always with optimised content. It always displays street names and other text with the same font size, never upside-down, and you only see the streets and objects that you need.

Map scaling has a limit in 3D map view mode. If you zoom out further, the map switches to 2D view mode.

Tap once to modify the view in a large step, or tap and hold the button to modify it continuously and smoothly.
<table>
<thead>
<tr>
<th>Tilting up and down</th>
<th>[↑, ↓]</th>
<th>Change the vertical view angle of the map in 3D mode. Tap once to modify the view in a large step, or tap and hold the button to modify it continuously and smoothly.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rotating left and right</td>
<td>[→, ←]</td>
<td>Changes the horizontal view angle of the map. Tap once to modify the view in a large step, or tap and hold the button to modify it continuously and smoothly.</td>
</tr>
<tr>
<td>Changing 2D, 3D, or 2D North up views</td>
<td>[3D, 2D, 2D]</td>
<td>Switch between the 3D perspective, 2D Heading up, and 2D North up map view modes. In Heading up mode the map is rotated so its top always points in the current driving direction. This is the default orientation in 3D map view mode. In North up mode, the map faces North.</td>
</tr>
<tr>
<td>Checking the compass</td>
<td>[▲]</td>
<td>The direction of the compass shows North.</td>
</tr>
<tr>
<td>Returning to normal navigation</td>
<td>[▲]</td>
<td>Move the map back to follow the current GPS position. Automatic map rotation is also re-enabled. The map manipulation buttons disappear and the navigation continues.</td>
</tr>
<tr>
<td>Selecting additional options</td>
<td>[▲]</td>
<td>Open a list of additional features like saving a location, or searching for Places around the cursor.</td>
</tr>
<tr>
<td>Selecting a destination</td>
<td>[Select as Destination]</td>
<td>Select the cursor location as a new destination. The route is automatically calculated.</td>
</tr>
</tbody>
</table>
1.4 Navigation view

The navigation view is the main screen of iGO Navigation app that shows the planned route on a map. iGO Navigation app works with digital maps which are not simply the computerised versions of traditional paper maps. Similarly to paper road maps, the 2D mode of digital maps shows you streets and roads. Elevation is also illustrated in colour.

The navigation view displays the following screen buttons, data fields, and route information on the map during navigation:

Note! Some buttons, fields, or icons may not be available in your product version.
<table>
<thead>
<tr>
<th>Number</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Current position marker</td>
<td>The current position is displayed as a blue arrow by default. When there is no GPS position, the current position marker is transparent and it shows your last known position. See page 19.</td>
</tr>
<tr>
<td>2</td>
<td>GPS position</td>
<td>The dot near the arrow shows the GPS position as perceived by the GPS receiver. See page 19.</td>
</tr>
<tr>
<td>3</td>
<td>Planned route</td>
<td>The planned route is displayed as an orange line line.</td>
</tr>
</tbody>
</table>
| 4      | Data fields                 | Three data fields show the following information:  
  - The estimated time of the arrival at the destination.  
  - The remaining time of the trip.  
  - The remaining distance to the destination.  
Tap this area to access the Trip Computer screen with additional information about the current trip on a dashboard and in the Trip Summary.  
You can change the default values in Settings (page 90) or by tapping and holding the area where the data fields appear.  
If you have not selected a destination, you can see your heading instead of the three data fields. |
<p>| 5      | Next turn preview           | It shows the type of the next manoeuvre and its distance. See page 19.                                                                                                                                       |
| 6      | Second next turn preview    | It shows the type of the second next manoeuvre if it is near the first one. See page 19.                                                                                                                |
| 7      | Next street                 | It displays the name of the next street. See page 19. If you have not selected a route destination, you can see nearby house numbers, if they are available.                                                  |
| 8      | Parking around destination  | It appears near the destination. By tapping it, you can check the available parking facilities around your destination. See page 81.                                                                       |
| 9      | Destination menu            | It appears near the destination. By tapping it, you can check the trip summary, find Places around your final destination, save the current location, switch to pedestrian navigation or suspend the navigation. |
| 10     | Traffic                     | It shows traffic-related information. See page 61.                                                                                                                                                         |
| 11     | Lane information            | On multi-lane roads, it shows the lanes ahead and their directions. The highlighted arrows represent the lanes and direction you need to take. See page 21.                                                |</p>
<table>
<thead>
<tr>
<th></th>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>12</td>
<td>Alert point warning</td>
<td>It shows the type of the alert points when approaching a road safety camera or other Alert Points like school zones or railroad crossings. You must make sure that using this feature is legal in the country where you intend to use it. See page 89.</td>
</tr>
<tr>
<td>13</td>
<td>Speed limit warning</td>
<td>It shows the current speed limit of the road. See page 89.</td>
</tr>
<tr>
<td>15</td>
<td>Signpost</td>
<td>It shows the available destinations and the road numbers. See page 22.</td>
</tr>
<tr>
<td>16</td>
<td>Motorway services</td>
<td>By tapping it, you can check the details of the next few service stations (petrol stations, restaurants) when travelling on a motorway. See page 24.</td>
</tr>
<tr>
<td>18</td>
<td>Navigation menu</td>
<td>By tapping it, you can open the Navigation menu, where you can reach other parts of iGO Navigation app.</td>
</tr>
<tr>
<td>19</td>
<td>Street name</td>
<td>It shows the current street name. By tapping it, you can open the Where Am I screen. See page 82.</td>
</tr>
<tr>
<td>20</td>
<td>3D objects</td>
<td>They display hills, mountains, roads, landmarks, and buildings in 3D.</td>
</tr>
</tbody>
</table>

If you are approaching a motorway exit or a complex intersection and the needed information exists, the map is replaced with a 3D view of the junction. See page 22.

When entering a tunnel, the map is replaced with a generic tunnel image. See page 23.
1.4.1 Streets and roads
iGO Navigation app shows the streets similarly to paper road maps. Their width and colours correspond to their importance; you can easily tell a motorway from a small street.

1.4.2 GPS position markers
When your GPS position is available, iGO Navigation app marks your current position. By default, this marker is a blue arrow. The dot near the arrow shows the GPS position as perceived by the GPS receiver.

The exact location of the current position marker depends on the vehicle type used for route calculation. It can be set in inRoute preferences (page 1).

- If you choose pedestrian navigation, the current position marker is at your exact GPS position. The direction of the icon shows your current heading.
- In all other cases, the position marker may not show your exact GPS position and heading. If roads are near, the GPS position is locked on the road and aligned to the nearest road to suppress GPS position errors, and the direction of the icon is aligned to the direction of the road.

1.4.3 Turn preview and next street
When navigating a route, the top section of the Navigation view shows information about the next route event (manoeuvre) and the next street or the next town.

There is a field in the top left corner displaying the next manoeuvre. Both the type of the manoeuvre (turn, roundabout, exiting motorway, and so on) and its distance from the current position are displayed.

A smaller icon shows the type of the second next manoeuvre if it is near the first one. Otherwise, only the next manoeuvre is displayed. Tap the icon of the actual manoeuvre to open the Itinerary screen.

1.4.4 The planned route
The planned route is the currently navigated route. Whenever the destination is set, the route is active until you delete it, reach your destination or suspend navigation. iGO Navigation app displays the route in the following ways:
<table>
<thead>
<tr>
<th>Symbol</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
</table>
| ![Symbol](image) | Current GPS position and starting point | It is your current position displayed on the map.  
• In pedestrian mode it is the GPS position.  
• If a vehicle is selected for route calculation and roads are near, the arrow jumps to the nearest road.  
• Normally, if GPS position is available, the route starts from the current position. If there is no valid GPS position, iGO Navigation app uses the last known position as the starting point. |
| ![Symbol](image) | Waypoint (intermediate destination) | It is an intermediate destination of the route before reaching the final destination. |
| ![Symbol](image) | Destination (end point) | It is the final destination of the route. |
| ![Symbol](image) | Route colour | The route always stands out with its colour on the map, both in daytime and night colour modes. |
| ![Symbol](image) | Streets and roads that are excluded from the navigation | You can choose whether you want to use or avoid certain road types (page 85). However, when iGO Navigation app cannot avoid such roads, the route includes them and shows them in a colour that is different from the route colour. |
| ![Symbol](image) | Streets and roads that are affected by traffic events | Road segments may be affected by traffic events. These streets and roads are displayed in a different colour, and small symbols displayed along the route show the type of the traffic event. |

### 1.4.5 Manoeuvre icons

During navigation the next manoeuvre is displayed in the top left corner. Most of the manoeuvre icons are intuitive. The following table lists some of the frequently shown route events:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Icon" /></td>
<td>Turn left.</td>
</tr>
<tr>
<td><img src="image" alt="Icon" /></td>
<td>Turn right.</td>
</tr>
<tr>
<td><img src="image" alt="Icon" /></td>
<td>Turn back.</td>
</tr>
<tr>
<td>Icon</td>
<td>Function</td>
</tr>
<tr>
<td>------</td>
<td>----------</td>
</tr>
<tr>
<td><img src="image" alt="Bear right." /></td>
<td>Bear right.</td>
</tr>
<tr>
<td><img src="image" alt="Turn sharp left." /></td>
<td>Turn sharp left.</td>
</tr>
<tr>
<td><img src="image" alt="Keep left." /></td>
<td>Keep left.</td>
</tr>
<tr>
<td><img src="image" alt="Continue straight in the intersection." /></td>
<td>Continue straight in the intersection.</td>
</tr>
<tr>
<td><img src="image" alt="Enter the roundabout and take the first exit (next manoeuvre)." /></td>
<td>Enter the roundabout and take the first exit (next manoeuvre).</td>
</tr>
<tr>
<td><img src="image" alt="Enter the roundabout (second next manoeuvre)." /></td>
<td>Enter the roundabout (second next manoeuvre).</td>
</tr>
<tr>
<td><img src="image" alt="Enter the motorway." /></td>
<td>Enter the motorway.</td>
</tr>
<tr>
<td><img src="image" alt="Exit the motorway." /></td>
<td>Exit the motorway.</td>
</tr>
<tr>
<td><img src="image" alt="Board the ferry." /></td>
<td>Board the ferry.</td>
</tr>
<tr>
<td><img src="image" alt="Leave the ferry." /></td>
<td>Leave the ferry.</td>
</tr>
<tr>
<td><img src="image" alt="Approaching a waypoint on the right." /></td>
<td>Approaching a waypoint on the right.</td>
</tr>
<tr>
<td><img src="image" alt="Approaching the destination." /></td>
<td>Approaching the destination.</td>
</tr>
</tbody>
</table>

### 1.4.6 Lane information

When navigating on multi-lane roads, it is important to take the appropriate lane in order to follow the planned route. If lane information is available in the map data, iGO Navigation app displays the lanes and their directions using small arrows at the bottom of the map. Highlighted arrows represent the lanes and the direction you need to take.
1.4.7 Signposts

If necessary information is available, iGO Navigation app displays signposts at the top of the map. The colour and style of the signposts are similar to the real ones you can see above roads or by roadsides. They show the available destinations and the road numbers.

All signposts look similar when cruising (when there is no planned route). During navigation only the signpost that points to the lane(s) to be taken is highlighted; all the others are darker.

If you want to hide the currently displayed signposts, tap any of them and the normal Navigation view returns until new signpost information is received.

You can modify the signpost settings in [page 90].

1.4.8 Junction View

If you are approaching a motorway exit or a complex intersection and the needed information exists, the map is replaced with a 3D view of the junction. The lanes you need to take are displayed with arrows. At the top of the screen, road signs show you additional information.

If you want to hide the currently displayed junction and return to the Navigation view, tap the picture.

There are two kinds of Junction Views:

Provider Junction Views show a realistic view of the junction with realistic pictures of the road signs.
Where Provider Junction Views are not available but the necessary information exists, 
Generic Junction Views show a generic view of the junction, focusing on the number and 
layout of lanes only. The road signs are created from road shield, road number, and 
destination information received in the map data.

Junction view can be turned off in [Navigation View]. See page 90.

1.4.9 Tunnel view

When entering a tunnel, the map is replaced with a generic tunnel image so that surface 
roads and buildings cannot distract you.

The top-down overview of the tunnel displayed in a separate window helps you orientate 
yourself. The remaining distance in the tunnel is also displayed.

After leaving the tunnel, the original map view returns.

Tunnel view can be turned off in [Navigation View]. See page 90.
1.4.10 Motorway services

When you are driving on a motorway, the button appears at the top right corner of the Navigation view. Tap it to open a panel with the details of the next few service stations (petrol stations, restaurants).

Tap any of them to display the exit area on the map. You can now easily add this service station as a waypoint to your route if necessary.

If you want to display other types of Places at the next few service stations, you can change the icons in Navigation View. See page 90.

1.4.11 3D object types

iGO Navigation app supports the following 3D object types:

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>3D terrain</td>
<td>iGO Navigation app displays 3D hills and mountains in the Navigation view, and illustrates them by colouring and shading on the 2D map.</td>
</tr>
<tr>
<td>Elevated roads</td>
<td>Elevated roads are complex intersections and vertically isolated roads (such as overpasses or bridges) displayed in 3D.</td>
</tr>
<tr>
<td>3D landmarks</td>
<td>Landmarks are 3D representations of prominent or well-known objects.</td>
</tr>
<tr>
<td>3D buildings</td>
<td>3D buildings are block representations of full town building data containing actual building sizes and positions on the map.</td>
</tr>
</tbody>
</table>
1.4.12 Traffic events

Road segments affected by traffic events are displayed in a different colour on the map.

The following icons may appear at the top right corner of the screen:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Icon]</td>
<td>It is displayed when traffic events are not received.</td>
</tr>
<tr>
<td>![Icon]</td>
<td>It is displayed when traffic events are received but they do not affect the planned route.</td>
</tr>
<tr>
<td>![Icon]</td>
<td>It shows the type of the next traffic event with the expected delay.</td>
</tr>
<tr>
<td>![Icon]</td>
<td>It shows the type of the next traffic event if it does not cause any delay or the delay is not known.</td>
</tr>
</tbody>
</table>

For more information, see page 61.

1.5 Navigation menu

On the Navigation view, tap ![Icon] to open the Navigation menu.
You can see the following menu options when you are navigating without a planned route:

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>![New Route]</td>
<td>Select your destination by entering an address or its coordinates, or by selecting a Place, a Saved Location, or a Saved Route. You can also look up your recent destinations from the History. When Internet connection is available, the Online Search option can be a further help to find your destination.</td>
</tr>
<tr>
<td>![Multipoint Route]</td>
<td>Build your route from one or more route points. You can also plan a route independently of your current GPS position by setting a new starting point.</td>
</tr>
<tr>
<td>![Traffic]</td>
<td>Check the traffic events affecting your route,</td>
</tr>
<tr>
<td>![Useful Information]</td>
<td>Access additional options and check navigation-related information.</td>
</tr>
<tr>
<td>![Shop]</td>
<td>Use the Shop to download free or pay maps or other navigation-related content to your phone.</td>
</tr>
<tr>
<td>![Settings]</td>
<td>Customise the way the navigation software works.</td>
</tr>
<tr>
<td>![About]</td>
<td>The About section provides you with product information. Read the Software and Database End User License Agreement, or check the map and other contents of the application. You can also access program usage statistics.</td>
</tr>
</tbody>
</table>

With a planned route, the following menu options are also available:

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Add Waypoint]</td>
<td>Add an intermediate destination to your route.</td>
</tr>
<tr>
<td>![Detours &amp; Alternatives]</td>
<td>See route alternatives to avoid parts of the route, or to avoid a specific road from your planned route.</td>
</tr>
<tr>
<td>![Route Summary]</td>
<td>View the route in its full length on the map and check route parameters and route alternatives. Tap to access additional options, like Simulation or Route Preferences.</td>
</tr>
<tr>
<td>![Delete Route]</td>
<td>Delete your route.</td>
</tr>
<tr>
<td>![Delete Waypoint]</td>
<td>Delete the next waypoint or the whole route. It is displayed if there is a multipoint route.</td>
</tr>
</tbody>
</table>
In the navigation menu, you have the following additional options:

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>🌟</td>
<td>Open the Saved Locations screen where you can save a location as a favourite destination or edit a saved location.</td>
</tr>
<tr>
<td>🔊</td>
<td>Set the volume or mute the navigation.</td>
</tr>
<tr>
<td>🌉</td>
<td>Switch to 2D (2D), 2D North up (2D) view or back to 3D mode.</td>
</tr>
<tr>
<td>⏸️</td>
<td>Suspend navigation.</td>
</tr>
<tr>
<td>🎁</td>
<td>Resume navigation.</td>
</tr>
<tr>
<td>🗣️</td>
<td>Check those notifications that contain important information but do not require immediate action from the users. If there are no notifications, this icon is not displayed.</td>
</tr>
<tr>
<td>🌐</td>
<td>The Menu button appears when the Navigation view is displayed. Tap it to open the Navigation menu.</td>
</tr>
<tr>
<td>🔄️</td>
<td>The More button appears on the screen to display additional features. Tap it to open the list of additional features on certain screens.</td>
</tr>
<tr>
<td>⏪</td>
<td>Tap the Back button to return to the previous screen. You can also press and hold this button to quickly return to the Navigation view from any other screen.</td>
</tr>
</tbody>
</table>
2 Warnings and safety information

The navigation system helps you find your way to your destination with the built-in GPS receiver. iGO Navigation app does not transmit your GPS position; others cannot track you.

iGO Navigation app collects usage information and GPS logs that may be used for improving the application and the quality of maps if you accept it when first using the application. The data are processed anonymously; no one is able to track any personal information. If you change your mind later, you can enable or disable the log collection in Settings (page 94).

It is important to look at the display only when it is safe to do so. If you are the driver of the vehicle, we recommend that you plan and review your route before you start your journey. Plan the route before your departure and stop if you need to change the route.

You must follow the traffic rules. If you deviate from the planned route, iGO Navigation app changes the instructions accordingly.
3 Using the navigation

You can select the destination and start navigating to it right away (normal navigation) if you need a route for immediate navigation.

You can also plan a route independently of your current GPS position even without GPS reception. To achieve this, you need to set a new starting point in the Multipoint Route menu. It also suspends guidance so that the route is not recalculated when a new position is received. See Page 63.

You can plan routes with multiple destinations by selecting a first and a second destination and adding it to your route. You can add as many destinations to your route as you like. See Page 58.

3.1 Selecting a destination

You can choose your destination by selecting one of the following options:

- Using combined search to search among different destination types at once, see page 29
- Entering a full address or a part of an address, for example a street name without a house number, see page 33
- Selecting a Place as your destination, see page 40
- Selecting a previously saved location as your destination, see page 51
- Selecting a location from the History of previously used destinations, see page 52
- Selecting a previously saved route, see page 54
- Entering the coordinate of the destination, see page 55
- Selecting a location on the map, see page 57
- Planning a multipoint route, see page 58.
- Selecting a destination using a picture, see page 1.

3.1.1 Using combined search

There are several ways to select your destination. You can initiate a separate search for addresses, Places, saved locations, or recent destinations, but the fastest way to search for any of these is to use combined search.

Perform the following steps to use combined search:

1. Tap on the Navigation view to access the Navigation menu.

2. Tap on New Route.
3. Tap **Search in All**. You can see the input field at the top of the screen. Right next to it you can see the search area, the town around which the search is carried out. The default search area is the area where you are located. For a local search, skip the next step.

4. (optional) To search in a different area, tap the input field with the search area, and start entering the name of the new search area on the keyboard.

   ![Search in All](image)

   You only need to enter a few letters to get a result. The most likely result appears below the input field as you enter new letters.

   a. If the new search area is in a different country, start entering the country and the town. It is usually enough to type the first few letters of the country or town and conventional abbreviations can also be used.

   b. Tap **Search in All** to see the whole list of the matching results.
5. With the proper search area displayed, start entering the name, address, or category of the destination you are looking for.

6. Tap to switch to the result screen. You can see all the results in the list, regardless of their type. Addresses, Places, Place categories, Saved locations, and recent destinations are mixed in one list. You can immediately select the result you want to use as your destination or narrow the list of results for only one type (for example, Places).

7. If necessary, tap on the right side of the list and then tap the corresponding button to narrow the list of search results by type (the number on the related icon shows the number of the matching results):

   - Tap to see the list of recent destinations with a matching name or address.
   - Tap to see the list of your saved locations with a matching name.
   - Tap to see the list of matching addresses.
   - Tap to see the list of matching Place category names. Scroll the list and select one of the categories. You get the list of Places in that category ordered by their distance from your current position.
• Tap to see the list of matching Places ordered by their distance from your current location.

• (optional) If your product contains Places from different data providers, you can further narrow the list by showing the results from one provider only. Look for the provider logos. Tap one of them to see Places from that provider.

• Tap the Online Providers button to start the new search using the Online Search facility. Wait for the results and select an item from the list.

Tip!
To search for an intersection in the combined search, enter the names of the streets connected by the ‘&’ sign. You do not need to use spaces before and after the separator character. For example you can find the intersection of Collins Street and Douglas Avenue by entering strings, like "Collins St & Douglas Ave", "Collins & Douglas", "Col&Doug", etc. The more precise the input string is, the fewer false results are expected. If you enter "Collins St&", you get all the intersections of Collins Street and you can select the appropriate one from the result list.

8. Once the destination is selected, a full screen map appears with the selected point in the middle. If necessary, tap the map somewhere else to modify the destination. The cursor appears in the new location.

9. Check the settings for road types and change them if necessary.

    Tap to enable or avoid motorways, tap for roads with Period Charge or Per-use Toll, tap for ferries, or tap for carpool lanes.

10. Tap to confirm the destination, or tap to select a different destination.
11. The route is calculated and the map appears showing the entire route, where you can check route information and route alternatives. Tap to modify the route parameters, or tap to start your journey.

3.1.2 Selecting an address

If you know at least a part of the address, this is the quickest way to select your destination. Using the same screen, you can find an address by entering the following information:

- The exact address, including the house number, see page 33
- The centre of a town, see page 36
- The midpoint of a street, see page 37
- An intersection, see page 38
- Any of the above, starting the search with the postal code, see page 40.

3.1.2.1 Entering an address

To enter an address as the destination, perform the following steps:

1. Tap on the Navigation view to access the Navigation menu.
2. Tap and.
3. By default, iGO Navigation app proposes the country and town where you are (or in case there is no valid GPS position, the country and town of the last known position). If necessary, change the country, by performing the following steps:

   a. Tap the Country field.

   b. In the Select Country screen, you can immediately select a country from the list below the input field or start entering the first few letters of the country on the keyboard.

   c. Tap to open the list of results and select a country from the list.

4. If necessary, select a new town by performing the following steps:

   a. Tap the Town or Postcode field.

   b. (optional) On the Town of Postcode screen, you can select a town from the list of suggestions.

   c. Otherwise, start entering the first few letters of the town. The names that match the string appear in a list.
d. To open the list, tap and select the town.

5. Enter the street name by performing the following steps:
   
a. Tap the Street name field.
   
b. (optional) On the Select Street screen, you can immediately select a street from the list of suggestions.
   
c. Otherwise, start entering the street name on the keyboard. The names that match the string appear in a list.
   
d. Tap to open the list of results. Select the street from the list.
6. A full screen map appears with the selected point in the middle. If necessary, tap the map somewhere else to modify the destination. The cursor (⊙) appears at the new location.

7. Check the settings for road types and change them if necessary.
   - Tap ⚠️ to enable or avoid motorways, tap $ for roads with Period Charge or Per-use Toll, tap 🛳️ for ferries, or tap 🚗 for carpool lanes.

8. Tap 💥 to confirm the destination. You can also select a nearby point on the map or tap ⬅️ to select a different destination.

9. The route is calculated and the map appears showing the entire route, where you can check route information and route alternatives. Tap 🗑️ to modify the route parameters, or tap 🚗 to start your journey.

3.1.2.2 Selecting a town centre

The town centre is not the geometric centre of the town but an arbitrary point the map creators have chosen. In towns and villages, it is usually the most important intersection and in larger towns, it is one of the important intersections.
1. Go to Address, and modify the country as described earlier (page 33), if necessary.

2. If necessary, select a new town by performing the following steps:
   a. Tap the Town or Postcode field.
   b. (optional) On the Town of Postcode screen, you can select a town from the list of suggestions.
   c. Otherwise, start entering the first few letters of the town. The names that match the string appear in a list.
   d. To open the list, tap and select the town.

3. Tap Go to Town. This way the centre of the displayed town becomes the destination of the route.

### 3.1.2.3 Selecting the midpoint of a street
To navigate to the midpoint of a street without entering the house number, perform the following steps:

1. Go to Address, and select the country and town as described earlier. The Select Street screen appears.
2. Enter the street name by performing the following steps:
a. Tap the Street name field.

b. (optional) On the Select Street screen, you can immediately select a street from the list of suggestions.

c. Otherwise, start entering the street name on the keyboard. The names that match the string appear in a list.

d. Tap to open the list of results. Select the street from the list.

3. Instead of entering the house number, tap . The midpoint of the street is selected as the destination.

3.1.2.4 Selecting an intersection in a town
To navigate to an intersection, perform the following steps:

1. Go to , and select the country and city as described earlier.

2. Enter the street name by performing the following steps:
   a. Tap the Street name field.
b. (optional) On the Select Street screen, you can immediately select a street from the list of suggestions.

c. Otherwise, start entering the street name on the keyboard. The names that match the string appear in a list.

d. Tap \( \) to open the list of results. Select the street from the list.

3. Tap the House number or crossing street field and browse the list of crossing streets or start entering the street name in the field. Select one from the list.
3.1.2.5 Using the postcode to select a destination

You can also select any kind of destination by entering the postal code instead of the city name. To select the postal code, perform the following steps:

1. Go to [New Route] and modify the country as described earlier (page 33), if necessary.
2. Tap the Town or Postcode field.
3. Enter the postcode by performing the following steps:
   a. Tap [123] to open the numeric keypad.
   b. Start entering the postal code.
   c. Tap [Select Town or Postcode] to open the list of results.
   d. Find the place you need.
4. Continue the search as described previously (page 33).

3.1.3 Selecting a Place of Interest

You can search for Places of Interest (Places) in the [New Route] menu. Using the same screen, you can find a Place by selecting one of the following options:

- Finding frequently searched types of Places with the Quick search categories, see page 41
- Searching for a Place by its name, see page 45
- Searching for a Place by its category, see page 43

In case of emergency, you can also find help nearby, see page 49
3.1.3.1 Using Quick search categories

The Quick search feature helps you quickly find the most frequently selected types of Places. Perform the following steps:

1. Tap on the Navigation view to access the Navigation menu.

2. Tap and .

The following Quick search categories appear:

- **Petrol Stations Along Route**: If a planned route exists, petrol stations are searched along the route.
- **Accommodation At My Destination**: If a planned route exists, accommodation is searched around the destination.
- **Restaurant Along Route**: If a planned route exists, restaurants are searched along the route.
- **Parking At My Destination**: If a planned route exists, parking lots are searched around the destination.

If there is no planned route (destination is not selected), the search is carried out around the current position. If the current position is not available either (no GPS signal), places are searched around the last known position.
3. Tap any of the quick search buttons to get an instant list of Places.

4. The Places in the list can be ordered by their distance from the current or last known position, from the destination, or by the length of the necessary detour. If you need to reorder the list, tap \[\text{ Reorder} \]. To filter the list of results by providers, tap \[\text{All} \] and then the provider logo on the right side of the screen.

5. (optional) If needed, tap \[\text{Search By Name} \] to further filter the list of results.

6. Browse the list and tap one of the list items. A full screen map appears with the selected point in the middle. The name and address of the Place is displayed at the top of the screen.

7. Tap \[\text{Details} \] to see the details of the selected Place, or to save the location. If there is a telephone number saved for this Place, you can make a call to that number by tapping the green button at the bottom.

8. If necessary, tap the map somewhere else to modify the destination. The cursor (\[\text{Cursor} \]) appears at the new location.

9. Check the settings for road types and change them if necessary.

   Tap \[\text{Motorways} \] to enable or avoid motorways, tap \[\text{Period Charge} \] for roads with Period Charge or Per-use Toll, tap \[\text{Ferries} \] for ferries, or tap \[\text{Carpool Lanes} \] for carpool lanes.
10. Tap **Select as Destination** to confirm the destination. You can also select a nearby point on the map or tap **Start Navigation** to select a different destination.

11. The route is calculated and the map appears showing the entire route, where you can check route information and route alternatives. Tap **Start Navigation** to modify the route parameters, or tap **Start Navigation** to start your journey.

![Image of route summary]

### 3.1.3.2 Searching by category

To search for Places by their categories and subcategories, perform the following steps:

1. Tap **on the Navigation view to access the Navigation menu.**
2. Tap **New Route** and **Places**.
3. Tap **Search by Name or Category**.
4. Select the area around which you would like to search for the Place by tapping **Around Here**. By default, the search area is around the current position (or if it is not available, around the last known position). In this case, the following result list is ordered by the distance from this position.

   - Tap **Along Route** to search along the planned route, and not around a given point. This is useful when you search for a later stopover that results in a minimal detour only, such as searching for upcoming petrol stations or restaurants. (The result list is ordered by the length of the necessary detour.)

   - Tap **Around Destination** to search for a place around the destination of the planned route. (The result list is ordered by the distance from the destination.)
• Tap **In a Town** to search for a place within a selected town. (The result list is ordered by the distance from the centre of the selected town.)

5. (optional) If you have selected **In a Town**, select the town to search in.

6. Select one of the main Place categories (for example, Accommodation), then browse the subcategories (for example, Hotel or Motel) to find your destination.
7. You can turn the Category View off at any level to list all Places around the selected location or along the route.

8. (optional) The Places in the list can be ordered by the following criteria:
   - Name
   - Their distance from the current or last known position
   - Their distance from the selected town
   - Their distance from the destination
   - The length of the necessary detour.

   Tap to reorder the list.

   To filter the list of results by providers, tap and then the provider logo on the right side of the screen.

9. Browse the list and tap one of the list items. A full screen map appears with the selected point in the middle. The name and address of the Place is displayed at the top of the screen.

10. The process continues the same way as in case of any other search for Places. See page 41.

3.1.3.3 Searching by name

To search for a Place by name, browse the various Place categories, or use the mixture of the two search types, perform the following steps:

1. Tap on the Navigation view to access the Navigation menu.

2. Tap and .

3. Tap to open the Search By Name or Category window.

4. Select the area around which you would like to search for the Place. By default, the search area is around the current position (or if it is not available, around the last
known position). In this case, the result list is ordered by the distance from this position. Tap to select one of the following search areas:

- Tap to search for a place within a selected town. (The result list is ordered by the distance from the centre of the selected town.)

- Tap to search for a place around the destination of the planned route. (The result list is ordered by the distance from the destination.)

- Tap to search along the planned route, and not around a given position. This is useful when you search for a later stopover that results in a minimal detour only, such as searching for upcoming petrol stations or restaurants. (The result list is ordered by the length of the necessary detour.)

5. (optional) If you have selected , select the town to search in.
You can search for the name of a Place in all categories by performing the following steps:

1. Tap **Search By Name**. Using the keyboard, start entering the name of the Place or browse in the categories.

2. After entering a few letters, tap **Search By Name** to open the list of Places or Place categories with names containing the entered character sequence.

3. Browse the list, if necessary, and tap the desired list item. A full screen map appears with the selected point in the middle. The name and address of the Place is displayed at the top of the screen.

4. The process continues the same way as in case of any other Places search. See page 41.

### 3.1.3.4 Searching For A Place Using Online Search

If you have an Internet connection, you can search for places with the Online Search service.

1. Tap on the Navigation view to access the Navigation menu.

2. Tap **New Route** or **Online Search**.
3. Using the keyboard, start entering the text to search for. This text can be a type of Place (like "Hotel"), a type of goods you are looking for (like "Pizza" or "Vacuum cleaner") or even a street name followed by the city/town.

4. (optional) The local search is carried out around your current location. To search around a different location, enter the name of the city/town after the word you are looking for. You can enter up to 30 characters.

5. After entering the text, tap to open the list of results:

6. Browse the list if necessary and tap one of the list items. A full screen map appears with the selected point in the middle. The name and address of the Place is displayed at the top of the screen.

7. If necessary, tap the map somewhere else to modify the destination. The Cursor appears at the new location.

   Check the settings for road types and change them if necessary.
Tap 🏛️ to enable or avoid motorways, tap 🍀 for roads with Period Charge or Per-use Toll, tap 🛡️ for ferries, or tap 🚗 for carpool lanes.

8. The route is calculated and the map appears showing the entire route, where you can check route information and route alternatives. Tap 🛠️ to modify the route parameters, or tap 🏠 to start your journey.

3.1.3.5 Finding help nearby
To quickly search for nearby assistance, perform the following steps:

1. Tap 📬 on the Navigation view to access the Navigation menu.
2. Tap Useful Information and Help Nearby.

Places in the following pre-set search categories can be searched for around the current position (or around the last known position if the current position is not available):

- Car Repair: Car repair and roadside assistance services
- Health: Medical and emergency services
- Police: Police stations
- Petrol Station: Petrol stations

3. Tap any of the quick search buttons to get an instant list of those types of Places.

4. (optional) The Places in the list can be ordered by the following criteria:
   - By their distance from the current or last known position
   - By name.

   Tap to reorder the list.

5. Browse the list and tap one of the list items. A full screen map appears with the selected point in the middle. The name and address of the Place is displayed at the top of the screen.
6. The process continues the same way as in case of any other Places search. See page 41.

3.1.4 Selecting a Saved Location

To select a location that you have already saved (page 70), perform the following steps:

1. Tap on the Navigation view to access the Navigation menu.

2. Tap and .

3. The list of saved locations is displayed. It contains two pre-set categories: Home and Work.

4. Tap the location that you want to set as your destination. If necessary, browse the list to see more results.

5. (optional) If needed, tap to enable the editing option so that you can rename the saved locations or delete any of them.

6. After you have selected a saved location as the destination, a full screen map appears with the selected point in the middle.

7. If necessary, tap the map somewhere else to modify the destination. The cursor ( ) appears in the new location.
8. Check the settings for road types and change them if necessary.

   Tap ☰️ to enable or avoid motorways, tap $ for roads with Period Charge or Per-use Toll, tap 🛥️ for ferries, or tap 🚌 for carpool lanes.

9. Tap 📰 to confirm the destination. You can also select a nearby point on the map or tap 🔁 to select a different destination.

10. The route is calculated and the map appears showing the entire route, where you can check route information and route alternatives. Tap 📦 to modify the route parameters, or tap 🌀 to start your journey.

3.1.5 Selecting a History item

The destinations that you have used earlier appear in the History list. Smart History offers these locations from your previous destinations, using parameters like the current time of day, the day of week, and the current location. The more you use the navigation software, the better it can guess your desired destination. To select a History item, perform the following steps:
1. Tap 📚 on the Navigation view to access the Navigation menu.

2. Tap 📚 New Route. Two of the Smart History Items are displayed in the New Route to... screen for easy access. You can select one of them as your destination.

3. To open all the history items, tap 📚 History. The list of recent destinations appears. The list begins with the three most likely destinations that are selected based on your previous routes (Smart History). The rest of the destinations are ordered by the time they were last selected. If necessary, scroll the list to see earlier destinations.

4. Select a destination from the list.

5. A full screen map appears with the selected point in the middle. If necessary, tap the map somewhere else to modify the destination. The cursor (〇) appears at the new location.

6. Check the settings for road types and change them if necessary.

   Tap 🚗 to enable or avoid motorways, tap 💲 for roads with Period Charge or Per-use Toll, tap 🚢 for ferries, or tap 🚗 for carpool lanes.

7. Tap 📚 Select as Destination to confirm the destination. You can also select a nearby point on the map or tap 📚 to select a different destination.
8. The route is calculated and the map appears showing the entire route, where you can check route information and route alternatives. Tap to modify the route parameters, or tap to start your journey.

3.1.6 Selecting a saved route

The routes that you have saved earlier appear in a list. To select a previous route, perform the following steps:

1. Tap on the Navigation view to access the Navigation menu.

2. Tap and

3. The list of saved routes appears. If necessary, scroll the list to see earlier routes.

4. Select a route and the Multipoint Route screen appears. If necessary, modify the saved route. Otherwise, tap .
5. The route is calculated and the map appears showing the entire route, where you can check route information and route alternatives. Tap to modify the route parameters, or tap to start your journey.

3.1.7 Entering coordinates

To select a destination by entering its coordinates, perform the following steps:

1. Tap on the Navigation view to access the Navigation menu.

2. Tap and .

3. You can enter the latitude and longitude values in any of the following formats: decimal degrees, degrees and decimal minutes, or degrees, minutes and decimal seconds. Tap .
(optional) If necessary, tap \( \text{Tip!} \) then \( \text{UTM Coordinates} \) and enter the coordinate in UTM format.

4. A full screen map appears with the selected point in the middle. If necessary, tap the map somewhere else to modify the destination. The cursor \( \text{( )} \) appears at the new location.

5. Check the settings for road types and change them if necessary.

Tap \( \text{to enable or avoid motorways, tap \( \text{for roads with Period Charge or Per-use Toll, tap \( \text{for ferries, or tap \( \text{for carpool lanes.} \)

6. Tap \( \text{Select as Destination} \) to confirm the destination. You can also select a nearby point on the map or tap \( \text{to select a different destination.} \)
7. The route is calculated and the map appears showing the entire route, where you can check route information and route alternatives. Tap to modify the route parameters, or tap to start your journey.

3.1.8 Selecting a location on the map

To select a map location, perform the following steps:

1. Locate your destination on the map. Move and scale the map as necessary.

2. Tap the location that you want to select as your destination. The cursor appears there.

3. (optional) If needed, tap to list the Places near the selected point or to save this location.

Tip! If you already have a planned route, tap and to add the selected location to your route.

4. Tap to select the cursor as the destination.
5. The route is calculated and the map appears showing the entire route, where you can check route information and route alternatives. Tap to modify the route parameters, or tap to start your journey.

3.1.9 Planning a Multipoint Route
To build your route destination-by-destination, perform the following steps:

1. Tap on the Navigation view to access the Navigation menu.

2. Tap to select the destination.
5. The New Route to... screen appears, where you can select the destination of the route the same way as described in the previous sections.

6. When the selected location appears on the map, tap and the list returns. If needed, you can add further intermediate destinations.

7. To add more route points, tap or tap to change the final destination. The Add to Route... menu appears again, where you can select the new route point the same way as you have set the destination before.

8. (optional) Tap to optimise the whole route or the order of waypoints. You can also delete all the destinations.

9. When you have added all the route points, tap and the planned route is automatically calculated.

3.2 Checking route information and alternatives

To get a map overview of the planned route and check different parameters of the planned route, perform the following steps:

1. Tap on the Navigation view to access the Navigation menu.
2. In the Navigation menu, tap **Route Summary**.

The planned route is displayed in its full length on the map with the following additional information:

- The total length of route
- The total time of route.

By tapping **Route Info**, you can check detailed information about the route. If you tap the tab on the right side of the screen, you can narrow the route information, for example to show only motorway sections or toll roads.

By tapping **Alternatives**, you can see a list of route alternatives and select the most suitable route.
3. Tap on the Route Summary screen to carry out additional actions, for example edit your route preferences or display the itinerary.

### 3.3 Checking Traffic Events

Offline statistical traffic information (traffic patterns) can be taken into account in the route calculation based on the time of day and the day of week if suitable data can be found on the device. In addition, real-time traffic information can help you avoid current traffic events like temporary road closures or traffic jams caused by an accident. Both functions are subject to data availability.

For information on traffic icons, see page 25.

Road segments affected by traffic events are displayed in a different colour on the map, and small symbols above the road show the nature of the event.

To check the traffic summary, perform the following steps:

1. On the Navigation view, tap the traffic icon in the corner (for example, ) to open the Traffic Summary screen, or tap and .

2. If there is at least one significant event on the planned route, a description is displayed about the next event. Tap to see the list of all events.
3. Tap any of the list items to see its details and to display the affected road segment in its full length on the map.

To display real-time traffic information on the map, perform the following steps:

1. On the Navigation view, tap the traffic icon (for example, ) to open the Traffic summary screen and tap .

2. Tap to display real-time traffic information on the map. A 2D map is displayed with road segments coloured by the impact on the traffic flow.

3.4 Editing the route

When navigation has already started, there are several ways to modify the planned route. You have the following options:

- Setting a new starting point, see page 63
- Adding an additional destination, see page 64
- Modifying the list of destinations, see page 65
- Saving the planned route, see page 66
- Deleting the planned route, see page 67
• Selecting a route alternative when planning the route, see page 67
• Selecting a route alternative for an existing route, see page 68
• Pausing guidance, see page 70.

3.4.1 Setting a new starting point
For normal navigation, all routes are calculated from the current position. You can pause navigation to check future routes, simulate them or see their length in time and distance. Then you can set the starting point of the route to a location other than the current GPS position.

1. Tap on the Navigation view to access the Navigation menu.

2. In the Navigation menu, tap .

3. The first line from the bottom is the start of the route, normally the current GPS position. Tap , select , and confirm your action at the warning message.
4. The Change Start to... screen appears. Select the starting point of the route the same way you select a destination.

5. You can see the new starting point on the map. Tap Set Start Point and the Multipoint Route screen appears where you can continue adding a destination to your route.

6. Tap Calculate Route to continue. The map returns with a transparent position marker (showing that there is no GPS reception). If a planned route already exists, it is now recalculated starting from the selected location.

7. To return to normal navigation, tap Continue Guidance.

### 3.4.2 Adding an additional destination

If you already have a planned route and you select a new destination as described in the above sections, the route to the previous destination is deleted and a new route is calculated. To add a new intermediate destination to the planned route, perform one of the following actions:
Tap the map anywhere to browse it. After selecting the location on the map, tap Select as Waypoint and to add the selected location to your route as an intermediate destination. The other destinations of the route remain intact.

Tap ≫ on the Navigation view and tap Multipoint Route. Add a destination to your route as described on page 58.

3.4.3 Modifying the list of destinations
To edit your route, perform the following steps:

1. Tap ≫ on the Navigation view to access the Navigation menu.

2. In the Navigation menu, tap ≫ Multipoint Route.

You have the following options on this screen:

- Tap ≫ to delete all the destinations, or optimise the waypoints or the route.
- Tap the name of the intermediate destination to move it up or down in the list, to save the location, or to delete it from the list.
- If you have a route with at least one intermediate destination, you can delete the waypoint from the list right from the Main menu. Tap ≫ Delete Waypoint, then confirm the deletion.
3.4.4 Saving the planned route

To save the planned route, perform the following steps:

1. Select a destination as described earlier and tap `Select as Destination`.

2. Tap `Save Route` and.

3. Type in a name and tap.

4. The route is saved and it is available in `New Route` and `Saved Routes`.
By selecting a previously saved route, iGO Navigation app recalculates the route using the saved destination and/or the waypoints.

### 3.4.5 Deleting the planned route

You have the following two options to delete the navigated route:

- If you already have a planned route and you select a new destination as described in the above sections, the route to the previous destination is automatically deleted and a new route is calculated.

- In the Navigation menu, tap ![Delete Route](image) or ![Delete Waypoint](image). If there are no waypoints, the planned route is deleted after a confirmation. If you have waypoints, you can choose to delete the whole route, or only the next waypoint.

### 3.4.6 Selecting a route alternative when planning the route

To select from different route alternatives or change the route planning method after you have selected a new destination, perform the following steps:

1. Select a destination as explained earlier, and go to the route confirmation screen.

2. Tap ![Alternatives](image).

3. You can see the basic details of route alternatives. Tap any of them to see it on the map.
4. To view more suggestions, tap and scroll down for other alternative routes with different route planning methods.

5. Select one of the route alternatives and tap to return to the previous screen. iGO Navigation app recalculates the route. Tap to start your journey. The orange line now shows the new planned route.

3.4.7 Selecting a route alternative for an existing route

To recalculate the planned route with a different route planning method and to compare different route alternatives, perform the following steps:

1. Tap on the Navigation view to access the Navigation menu.

2. You can access the list of route alternatives from the Navigation menu in one of the following ways:
   - Tap and
   - Tap and
3. You can see the basic details of a few route alternatives. Tap any of them to see it on the map.

If there are suitable alternatives calculated with the route planning method that is selected in Route preferences (page 85), they are shown on top of the list. Routes with other route planning methods are shown at the bottom of the list.

4. If there are more than a few suggestions, you can tap More Results and scroll down for routes.

5. Select one of the route alternatives and tap Select to return to the previous screen. iGO Navigation app replaces the original route. Tap Start Navigation to start your journey. The orange line now shows the new planned route.

3.4.8 Setting a detour

1. Tap on the Navigation view to access the Navigation menu.

2. In the Navigation menu, tap Alternative Routes.
You can set up a detour for your route in the following ways:

- Tap **Avoid Special Sections** to open a list of special sections of the planned route such as stretches of motorway, toll road or ferry trips. Tap any of these items on the itinerary to avoid a special section.

- Tap **Avoid Specific Road** to open the full list of roads on the planned route. Tap any of these items on the itinerary to avoid that specific road.

- Tap **Avoid Route Ahead** to avoid a part of the planned route that is right ahead of you on the itinerary. You can set the distance for which you want to avoid the road ahead.

- Tap **Restore Original Route** to delete all detours that you have set up for the planned route.

### 3.4.9 Pausing guidance

When you are driving a planned route but you do not need guidance for a certain part of the route, you can suspend it and continue when it is needed again.

In the Navigation menu, tap **Pause** to suspend guidance.

Tap **Resume** to resume guidance.

### 3.5 Saving a location

To add any location to the saved locations (the list of frequently used destinations), perform the following steps:

1. Select a destination as described before. It can be an address, a Place, any location on the map, a previously used destination from History, and so on.
2. When the map appears with the selected location in the middle, tap.

3. Tap.

4. (optional) Using the keyboard, you can change the name offered for the Saved Location.

5. Tap to save the location.

To add your home and work address to the saved locations, perform the following steps:

2. Tap or. Tap to confirm your selection.

3. You can search for the address as described on page 29.

Planning a route to one of the saved locations is described on page 51.
3.5.1 Editing a saved location

To edit a location that you have already added as a Saved Location, perform the following steps:

2. The list of Saved locations is displayed.
3. Tap and .
4. Tap the location you want to edit, tap and enter the name of the location on the keyboard, then tap .

**Note!** In Saved Locations, Home and Work cannot be renamed. To change your home or work location, tap or , and confirm the address change.
5. Tap .

Adding a location to the list of saved locations is described on page 70.

3.6 Adding an Alert Point

You can save any map location as an Alert Point, for example a speed camera or a school zone.

1. If you would like to save an Alert Point for the first time, switch on the . In the Navigation menu, tap , then . Switch on and confirm your selection.
The warning for road safety cameras is disabled when you are in a country where road safety camera warning is prohibited. However, you must make sure that using this feature is legal in the country where you intend to use it.

1. Return to the Navigation view, and select the Alert Point. The red cursor appears there.

2. Tap

3. Scroll down the list and tap

4. Select the type of the Alert Point, the direction from which you expect the alert, and (if applicable) the speed limit for this Alert Point.

5. Tap to save the location as a new Alert Point.

3.7 Running a Simulation

To run a simulated navigation that demonstrates the planned route, perform the following steps:

1. Tap on the Navigation view to access the Navigation menu.
2. In the Navigation menu, tap 

3. Tap 

4. Tap 

   The simulation starts from the starting point of the route and leads you through the whole planned route using a realistic speed.

   (optional) You have the following controls during the simulation (the control buttons disappear after a few seconds but you can open them again if you tap the map):

   • Jump to the next route event (manoeuvre).

   • Pause the simulation.
• 
  • : Jump to the previous route event (manoeuvre).

• 
  • : Tap to increase the speed of the simulation to 4, 8 or 16 times faster. Tap again to return to normal speed.

5. Tap \( \times \) to stop the simulation.
4 Reference guide
The following sections describe the different concepts and menu screens of iGO Navigation app.

4.1 Concepts
The following sections describe and explain navigation-related concepts.

4.1.1 2D/3D GPS reception
The GPS receiver uses satellite signals to calculate its (your) position and needs at least four signals to give a three-dimensional position, including elevation. Because the satellites are moving and because objects can block the signals, your GPS device might not receive four signals. If three satellites are available, the receiver can calculate the horizontal GPS position but the accuracy is lower and the GPS device does not give you elevation data; only 2D reception is possible.

Several factors have an impact on the deviation between your real position and the one given by the GPS device. For example, signal delay in the ionosphere or reflecting objects near the GPS device have a different and varying impact on how accurately the GPS device can calculate your position.

4.1.2 Road safety cameras and other proximity Alert Points
There is a special proximity warning for road safety cameras (like speed or red light cameras) and other proximity Alert Points (like schools or railroad crossings). These Alert Points are not part of iGO Navigation app.

You can add your own Alert Points. See page 72.

The application can warn you when you approach road safety cameras like speed cameras or dangerous areas like school zones or railroad crossings. You can set up the different alert types individually in the Warnings settings, see page 89.

The following warning types are available:

- Audio warning: beeps are played while you are approaching one of these points, or extra alert sounds if you exceed the given speed limit while approaching.

- Visual warning: the type of the Alert Point, its distance and the related speed limit appear on the Navigation view while you are approaching one of these locations.

For some of the Alert Points, either the enforced or expected speed limit is available. For these points, the audio alert can be different if you are below or above the given speed limit.

- Only when speeding: The audio alert is only played when you exceed the given speed limit.

- When approaching: The audio alert is always played when approaching one of these Alert Points. In order to draw your attention, the alert is different when you exceed the speed limit.
The warning for road safety cameras is usually disabled when you are in a country where road safety camera warnings are prohibited. Make sure that using this feature is legal in the country where you intend to operate. Use it on your own responsibility.

4.1.3 Route calculation and recalculation
A route is a sequence of route events, that is, manoeuvres (for example, turns and roundabouts) to reach the destination. The route contains one starting point and one or more destinations. The starting point is the current (or last known) position by default. If you need to see a future route, the starting point can be replaced with any other given point. See page 63.

Once the destination has been selected, iGO Navigation app calculates the route based on your preferences. These preferences are the route planning method, the vehicle type, and the road types used or avoided when calculating the route. For detailed information on all the preferences, see Route preferences settings, page 85.

Real-time traffic events are also taken into account, which sometimes greatly modify the route. See page 78.

iGO Navigation app automatically recalculates the route if you deviate from the proposed itinerary.

If traffic services are enabled, iGO Navigation app considers real-time dynamic traffic information in route calculation and may also recalculate the route if the traffic situation changes during navigation.

4.1.4 Smart Zoom
Smart Zoom provides the following features:

- **While following a route**: When approaching a turn, it zooms in and raises the view angle to let you easily recognise your next manoeuvre. If the next turn is at a distance, it zooms out and lowers the view angle to be flat so you can see the road in front of you.
- **While driving without a planned route**: Smart Zoom zooms in if you drive slowly and zooms out when you drive at a high speed.

4.1.5 Speed limit warning
Maps may contain information about the speed limits of the road segments. iGO Navigation app is able to warn you if you exceed the current limit. This information may not be available for your region, or may not be fully correct for all roads on the map.

Speed warning can be fine-tuned in Warnings. See page 89.

You can also set the relative speed tolerance above which the application initiates the warning.

The following warning types are available:

- **Audio warning**: You receive a verbal warning when you exceed the speed limit with the given percentage.
• Visual warning: The current speed limit is shown on the map when you exceed it (for example).

You can also choose to see the speed limit sign on the map all the time.

### 4.1.6 Real-time traffic

Real-time traffic information can provide you with the current status of the traffic. Route calculation can avoid road blocks or unexpected traffic jams caused by an accident.

The following data sources are available:

- **Online traffic:**
  
  Online traffic can provide you with the real-time status of the traffic if an active Internet connection is available.

  The application automatically takes account of the traffic events received. You do not need to set anything in iGO Navigation app.

  When iGO Navigation app receives traffic information that may affect your route, it warns you that it is recalculating the route. The navigation continues with a new optimal route considering the most up-to-date traffic conditions.

  For information on traffic icons, see page 25.

  To fine-tune this service, you have the following options in Traffic settings (page 93):

  - Set the minimum amount of time that you think is worth saving at the cost of a detour.
  - Instruct iGO Navigation app to have you confirm the new planned route before it takes effect.

  If there are traffic events on the planned route that the application has not bypassed, the icon opens the list of significant traffic events to let you quickly check them.

### 4.1.7 Intelligent navigation

With the help of intelligent navigation, the planned route can adapt to traffic and other changes during navigation. The following sections describe these features.
4.1.7.1 Congestion detour on highways

iGO Navigation app may offer a detour when you slow down on a highway due to a traffic jam. The Potential congestion detour window appears and shows the length and duration of the detour.

You can ignore this message and keep the original route by tapping **Dismiss** or you can check the suggested route by tapping **Preview**.

By tapping the plus/minus signs, you can increase or decrease the distance to avoid on the highway.

You can accept the recommended detour by tapping **Avoid**.
4.1.7.2 Real-time alternative routes

iGO Navigation app may offer an alternative route on normal roads in case of a traffic jam. The possible alternative route window appears and shows the length and duration of the detour.

You can ignore this message and keep the original route by tapping **Dismiss** or you can check the suggested route by tapping **Preview**. You can accept the recommended detour by tapping **Accept**.
4.1.7.3 Parking around destination

If you leave the planned route by exiting a motorway, iGO Navigation app tries to guess the reason for making a detour. By tapping , you can open a top-down map with the recommended parking Places around the destination. By tapping the arrows on the sides, you can switch between the recommended parking facilities.

By tapping and , the selected parking place becomes your destination.

4.1.7.4 Hints upon detour

If you leave the planned route by exiting a motorway, iGO Navigation app tries to guess the reason for making a detour. The Reason for detour window appears and shows available petrol stations, restaurants or other Places around the current position. Also, if there are avoidable parts of the original route ahead (like a tunnel, a toll road or a ferry), you can find them in the list, in case you want to bypass them.

By tapping one of the Places, iGO Navigation app creates a waypoint and navigates you to the selected place. You can ignore them by tapping .

4.2 Useful Information menu
The Useful Information menu provides various additional functions. It can be found in the Navigation menu. You need an Internet connection via your mobile phone to access online services, like parking and weather information.

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>🗺 Where Am I?</td>
<td>Shows information on the current position (latitude, longitude, nearest town, next crossing street, and so on) or the last known position if GPS reception is not available. See page 82.</td>
</tr>
<tr>
<td>📍 Help Nearby</td>
<td>Offers assistance near your current position. See page 49.</td>
</tr>
<tr>
<td>🇨🇳 Country information</td>
<td>Offers a list of countries with useful driving information about the selected country (for example speed limits, maximum blood alcohol level).</td>
</tr>
<tr>
<td>🕊 Trip Monitor</td>
<td>Shows statistical data of your trips, like the start time, end time and average speed, see page 83. Track logs, the sequence of the positions given by the GPS receiver, can be saved together with the trip logs. They can later be displayed on the map.</td>
</tr>
<tr>
<td>🌅 Sunrise &amp; Sunset</td>
<td>Shows the exact sunrise and sunset times for all your route points.</td>
</tr>
</tbody>
</table>

4.2.1 Where Am I

This screen contains information about the current position (or about the last known position if GPS reception is not available). You can access it the following two ways:

- By going to the Navigation menu and tapping 📡 Useful Information and 🏢 Where Am I?
• By tapping the current street name if it is displayed below the current position marker on the map.

The following information is shown on the Where Am I screen:

• Address details (when available) of the current position
• Latitude and Longitude (coordinate of the current position in WGS84 format)
• The nearest town
• Next crossing road/street
• Previous crossing road/street.

You can also perform some actions on this screen.

Tap to add the current position to the saved locations and to check the country information.

You can also search for assistance near your current position. Tap to open a new screen for quick search and select a category. For detailed information, see page 49.

4.2.2 Trip Monitor

Trip Monitor logs information about your route.

You can record a new trip by tapping and stop it by tapping

By tapping on the Trip Monitor screen, you can select the following options:

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Edit</td>
<td>By selecting a recorded trip, you can delete, rename, or change the colour of the recorded route.</td>
</tr>
</tbody>
</table>
You can export all logs into the sdmmc folder.

You can access the Trip Monitor Settings, where you can enable saving the trip logs automatically or you can save the trip logs manually. See page 93.

By tapping your recorded trip on the Trip Monitor screen, you can check information such as time, speed, altitude and distance.

By tapping on the Trip Data Details screen, you can view the trip on the map, export track logs, and check the elevation and speed profiles.

4.3 Settings menu
You can configure the navigation settings, and modify the behaviour of iGO Navigation app, by tapping and . Scroll down to view more options.

Note! Changing some of these settings may not have an effect in your current region if the map data do not contain the required information.

The Settings menu provides the following options:
<table>
<thead>
<tr>
<th><strong>Button</strong></th>
<th><strong>Function</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Route Preferences</td>
<td>Select the type of vehicle you are driving, the road types used in route planning, and the route planning method.</td>
</tr>
<tr>
<td>Sound</td>
<td>Adjust the different sound volumes.</td>
</tr>
<tr>
<td>Warnings</td>
<td>Enable and set up warnings for speed limit, Alert Points (such as speed cameras), and road signs.</td>
</tr>
<tr>
<td>Navigation View</td>
<td>Fine-tune the appearance of the Navigation view or adjust how the software helps you navigate with different kinds of route-related information on the Navigation view.</td>
</tr>
<tr>
<td>Regional</td>
<td>Change the voice guidance language, set the time zone, the measurement units, the time and date formats, and customise the application for your local language.</td>
</tr>
<tr>
<td>Display</td>
<td>Enable or disable menu animations, set separate themes for daytime and nighttime use.</td>
</tr>
<tr>
<td>Traffic</td>
<td>Enable or disable traffic information and modify detour settings.</td>
</tr>
<tr>
<td>Trip Monitor</td>
<td>Turn the automatic trip log saving on or off and check the current size of the trip database.</td>
</tr>
<tr>
<td>Usage Reports</td>
<td>Collects usage information and GPS logs that may be used for improving the application and the quality and coverage of maps. Tap this button to enable or disable collecting these data.</td>
</tr>
<tr>
<td>Start Configuration Wizard</td>
<td>Modify the basic software parameters set during the initial set-up process. See page 5.</td>
</tr>
<tr>
<td>Advanced Settings</td>
<td>Change advanced options regarding the behavior of iGO Navigation on your mobile device.</td>
</tr>
</tbody>
</table>

### 4.3.1 Route preferences settings

The following settings determine how routes are calculated:

<table>
<thead>
<tr>
<th><strong>Button</strong></th>
<th><strong>Function</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Vehicle</td>
<td>Set the type of vehicle you want to use to navigate the route. Based on this setting, some of the road types can be excluded from the route, or some of the restrictions may not be taken into account in route calculation. See page 1.</td>
</tr>
</tbody>
</table>
4.3.1.1 Route Planning Method types

You can select from the following route planning method types:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fast</td>
<td>Gives a quick route if you can travel at or near the speed limit on all roads. Usually, the best selection for fast and normal cars.</td>
</tr>
<tr>
<td>Easy</td>
<td>Results in a route with fewer turns and no difficult manoeuvres. With this option, you can make iGO Navigation app take, for example, the motorway instead of a series of smaller roads or streets.</td>
</tr>
<tr>
<td>Short</td>
<td>Gives a short route to minimise the travel distance. Usually optimal for pedestrians, cyclists or slow vehicles. Searching for a short route regardless of the speed, this route type is rarely optimal for normal vehicles.</td>
</tr>
<tr>
<td>Green</td>
<td>Gives a quick but fuel-efficient route based on the fuel consumption data. Travel cost and CO₂ emission calculations are estimations only. They cannot take elevations, curves and traffic conditions into consideration.</td>
</tr>
<tr>
<td>Economical</td>
<td>For vehicle types where Green routing is not available, this method combines the benefits of Fast and Short. iGO Navigation app calculates as if it were calculating the Fast route, but it takes other roads as well to save fuel.</td>
</tr>
</tbody>
</table>

Note! Depending on the vehicle type, some methods may not be available.

4.3.1.2 Road types

To let the route fit your needs, you can also set which road types are to be considered for or to be excluded from the route.

Excluding a road type is a preference. It does not necessarily mean total prohibition. If your destination can only be accessed using some of the excluded road types, they are used only as much as necessary. In this case, a warning icon is shown on the Route information screen, and the part of the route not matching your preference is displayed in a different colour on the map.

The following road types are available:
You might need to avoid motorways when you are driving a slow car or you are towing another vehicle.

Charge roads are pay roads where you can purchase a pass or vignette to use the road for a longer period of time. They can be enabled or disabled separately from toll roads.

Per-use toll roads are pay roads where there is a per-use charge in the routes by default. If you disable toll roads, iGO Navigation app plans the best toll-free route.

iGO Navigation app includes ferries in a planned route by default. However, a map does not necessarily contain information about the accessibility of temporary ferries. You might also need to pay a fare on ferries.

Car shuttle trains are used to transport vehicles for a relatively short distance and they usually connect places that are not easily accessible on a road, for example, in Switzerland.

Carpool or HOV lanes can be used if a given number of passengers is travelling in the vehicle. Check whether you are allowed to use carpool lanes before enabling this road type.

iGO Navigation app excludes unpaved roads by default. Unpaved roads can be in a bad condition and you usually cannot reach the speed limit on them.

### 4.3.2 Sound settings

You can modify the following settings:

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Voice</td>
<td>Adjust the volume of the guidance sounds (verbal instructions) or mute it.</td>
</tr>
<tr>
<td>Alerts</td>
<td>Adjust the volume of the non-verbal alert sounds (beeps) or mute it.</td>
</tr>
<tr>
<td>Ding</td>
<td>Turn off the attention tone preceding verbal instructions or adjust its volume.</td>
</tr>
<tr>
<td>Keys</td>
<td>Adjust the volume or mute the sound played when pressing the button.</td>
</tr>
</tbody>
</table>
You have the following options for each sound type:

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Volume slider</td>
<td>Adjust the volume of the related sound.</td>
</tr>
<tr>
<td>![Mute button]</td>
<td>Mute the related sound. The slider becomes inactive. Tap again to re-enable it.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Voice guidance button]</td>
<td>Disable verbal instructions. This function is enabled by default.</td>
</tr>
<tr>
<td>![Early Indication of Manoeuvres button]</td>
<td>Set whether you want an immediate announcement for the next manoeuvre after each turn, or it is enough to receive the information when the turn is near.</td>
</tr>
<tr>
<td>![Verbosity Level button]</td>
<td>Set the verbosity of the voice instructions, that is how much they tell and how often they speak.</td>
</tr>
<tr>
<td></td>
<td>- Minimal: the voice instruction is given once right before the next manoeuvre.</td>
</tr>
<tr>
<td></td>
<td>- Medium: the voice instruction is given when approaching the next manoeuvre and it is repeated right before the manoeuvre.</td>
</tr>
<tr>
<td></td>
<td>- Verbose: the voice instruction is given first relatively far from the next manoeuvre, it is repeated when approaching the next turn, and it is repeated again right before the actual manoeuvre.</td>
</tr>
</tbody>
</table>
### 4.3.3 Warnings settings

You can enable and modify the following settings:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Speed Limit** | iGO Navigation app is able to warn you if you exceed the current speed limit. This information may not be available in your region, or may not be fully correct for all roads on the map.  
This setting lets you decide whether you wish to receive visible and/or audible warnings.  
The following warning types are available:  
- Visual warning: the current speed limit is shown on the map when you exceed it.  
- Audio and Visual warning: besides the current speed limit being shown on the map, you also receive a verbal warning when you exceed the speed limit with the set percentage.  
If you prefer to see the speed limit sign on the map all the time (normally, it is shown only if you exceed the limit), you can set it here.  
You can also set the relative speed above which the application initiates the warning by adjusting a slider. The value can be different within and outside towns. |
| **Alert Points** | Tap it to receive a warning when approaching a road safety camera or other Alert Points like school zones or railroad crossings. You must make sure that using this feature is legal in the country where you intend to use it.  
You can set the warning type for the different Alert Point categories (alert types) individually. The following warning types are available:  
- Visual warning: the type of the Alert Point, its distance, and the related speed limit appear on the Navigation view while you are approaching one of these locations.  
- Audio and Visual warning: besides the visual alert, beeps are played while you are approaching one of these points, or extra alert sounds if you exceed the given speed limit while approaching.  
For some of the Alert Points, the enforced or expected speed limit is available. For these points, the audio alert can be different if you are below or above the given speed limit.  
- Only when speeding: The audio warning is only played when you exceed the given speed limit.  
- When approaching: The audio warning is always played when approaching one of these Alert Points. In order to draw your attention, the audio alert is different when you exceed the speed limit. |
Maps may contain driver alert information that can be shown on the Navigation view in a similar way as real-life road signs. Tap it to enable or disable the warning for these road segments (for example, dangers and sharp curves). For each category of warning signs, set the warning type (visual or audio and visual) and the distance from the hazard to receive the warning at.

### 4.3.4 Navigation View settings

These settings allow you to fine-tune the appearance of the Navigation view. You can also adjust how the software helps you navigate with different kinds of route-related information on the Navigation view.

Tap **Map Appearance** to adjust the navigation view to your needs, choose suitable colour themes from the list for both daytime and nighttime use, show or hide 3D buildings, landmarks, and manage your Place visibility sets (which Places to show on the map).

You can modify the following settings:

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Viewpoint Normal</td>
<td>Adjust the basic zoom and tilt levels to your needs. Three levels are available.</td>
</tr>
<tr>
<td>Colour Mode Auto</td>
<td>Switch between daytime and night colour modes or let the software switch between the two modes automatically a few minutes before sunrise and a few minutes after sunset.</td>
</tr>
<tr>
<td>Day Map Colours</td>
<td>Select the colour scheme used in daytime mode. Daytime colours are bright and similar to paper road maps.</td>
</tr>
<tr>
<td>Night Map Colours</td>
<td>Select the colour scheme used in night mode. Night colours are darker to keep the average brightness of the screen low.</td>
</tr>
</tbody>
</table>
Show or hide 3D landmarks (3D representations of prominent or well-known objects).

Show or hide 3D city models (3D block representation of full city building data containing actual building size and position on the map).

Show or hide the 3D elevation of the terrain.

Turn on Track Logs to show them on the map or turn them off.

Select which Places to show on the map while navigating. Too many Places make the map crowded so it is a good idea to keep as few of them on the map as possible. Tap the name of the Place category to show/hide it or to open the list of its subcategories.

You can modify the following additional settings on the Navigation View screen:

If you are navigating with a planned route, you can set three data fields to be displayed on the Navigation view. You can choose from the time of arrival at destination, distance to destination, time to destination, time of arrival at waypoint, distance to waypoint, time to waypoint, heading, or altitude. Without a planned route, there is only one data field that can be set to show the heading or the altitude.

Turn the Route Progress Bar on or off. If turned on, an orange line line is displayed on the side of the screen, and a blue arrow shows your progress.

Turn it on to get motorway service information (for example petrol stations, restaurants) or turn it off if you do not need it.

Select the service types displayed for the motorway exits. Choose from the Places categories.

Zoom out and show an overview of the surrounding area if the next manoeuvre is far and you are driving on a motorway. When you get close to the event, the normal map view returns.

Whenever adequate information is available, lane information similar to the real ones on road signs above the road is displayed at the top of the map. Tap it to turn this feature on or off.

If you are approaching a motorway exit or a complex intersection and the needed information exists, the map is replaced with a 3D view of the junction. Tap it to turn this feature on or let the map be displayed for the whole route.
When entering tunnels, the surface roads and buildings can be disturbing. Tap it to show a generic picture of a tunnel instead of the map. A top-down overview of the tunnel and the remaining distance are also displayed.

In certain situations, iGO Navigation app offers a detour when there is a traffic jam on a highway. See page 79.

In certain situations, iGO Navigation app offers an alternative route when there is a traffic jam on the road. See page 80.

In certain situations, iGO Navigation app offers parking Places when you approach your destination. See page 81.

In certain situations, iGO Navigation app offers different route alternatives when you leave the planned route and suddenly exit the motorway. See page 81.

### 4.3.5 Regional settings

You can modify the following settings:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Voice Language</strong></td>
<td>It shows the current voice guidance profile. Tap it to select a new profile from the list of available languages and speakers. Tap any of these to hear a sample voice prompt. Just tap 🔄 when you have selected the new spoken language.</td>
</tr>
<tr>
<td><strong>Units and Formats</strong></td>
<td>You can set the measurement units and time/date format to be used. iGO Navigation app may not support all the listed units in some voice guidance languages.</td>
</tr>
<tr>
<td><strong>Time Zone</strong></td>
<td>By default, the time zone is taken from the map information and adjusted by your current location. Here you can manually set the time zone and the daylight saving time.</td>
</tr>
</tbody>
</table>
4.3.6 Display settings
You can modify the following settings:

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Menu Animation</td>
<td>When animation is turned on, buttons on menus and keyboard screens, and screen transitions are animated.</td>
</tr>
<tr>
<td>Day Skin Theme</td>
<td>Select the style and colours of the application used in daytime mode.</td>
</tr>
<tr>
<td>Night Skin Theme</td>
<td>Select the style and colours of the application used in night mode. It is recommended to use darker colours at night to avoid distraction during driving in the dark.</td>
</tr>
</tbody>
</table>

4.3.7 Traffic settings
You can modify the following settings:

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Data source Online</td>
<td>Select what data source you want to use for receiving real-time traffic information:</td>
</tr>
<tr>
<td></td>
<td>• Online: uses an Internet connection.</td>
</tr>
</tbody>
</table>

4.3.8 Trip Monitor settings
Trip logs contain useful information about your recorded trips. You can enable and modify the following settings:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enable auto-saving</td>
<td>Trip monitor can record statistical data of your trips. If you need these logs later, you can let the application save them automatically for you.</td>
</tr>
</tbody>
</table>
Track logs, the sequence of the positions given by the GPS receiver, can be saved together with trip logs. They can later be displayed on the map. You can let the application save track logs whenever it saves a trip.

This is not a button. This line shows the current size of the trip database, the sum of all trip and track logs saved.

### 4.3.9 Usage Reports settings

If you enable it when first using the application, it collects usage information and GPS track logs that may be used for improving the application and the quality and coverage of maps. Data are processed anonymously; no one is able to track any personal information.

You can enable or disable collecting the following logs:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Application Usage Information</td>
<td>Anonymous statistical information on using the navigation software is collected for later development purposes. Understanding how different people use the application can help us improve the user interface and the program workflow.</td>
</tr>
<tr>
<td>GPS Tracks</td>
<td>Anonymous track logs are sometimes used for providing real-time information service. Your trips can also help us improve the quality and coverage of maps.</td>
</tr>
</tbody>
</table>

### 4.3.10 Advanced Settings

These settings allow you to fine-tune the behavior of iGO Navigation on your mobile device.

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Download using Wi-Fi only</td>
<td>If turned on, navigation content such as map updates will only be downloaded when you are connected to Wi-Fi. This helps you avoid charges that mobile operators may have in place for downloading large files over the mobile network.</td>
</tr>
<tr>
<td>Continue download after restart</td>
<td>If turned on, any navigation content download that may have been paused when you last exited iGO Navigation will be resumed automatically upon the next startup.</td>
</tr>
</tbody>
</table>
5 Troubleshooting

This section offers possible solutions to issues that may occur during the operation of iGO Navigation app.

5.1 GPS signal cannot be received

Issue: The current location is not available, because GPS signal cannot be received.

Cause 1: GPS signal is weak or may not be available if you are between tall buildings, in garages or tunnels as the signal weakens or distorts as it travels through solid material.

Solution 1: Go to a place where there is a clear sight of the sky or at least a bigger part of the sky is visible.

Cause 2: It may take several minutes to receive GPS signals when first using iGO Navigation app, or when your last known position is farther away from your current position.

Solution 2: Wait a few minutes for the GPS signal.

5.2 Address cannot be found

Issue: iGO Navigation app cannot find the address you entered.

Cause: The digital map data may not include every single address.

Solution 1: If the house number is not known or iGO Navigation app cannot find it, select only the street name. This way, iGO Navigation app will navigate you to the midpoint of the street, where you can find the exact address more easily.

Solution 2: Search for another address that is close to the destination.

Solution 3: Search for the coordinates or a nearby Place of Interest.

5.3 The calculated route is not optimal

Issue: The planned route is too long or includes several minor roads.

Cause: In the route planning method is not set to the optimal parameter.

Solution: Select your preferred route planning method by performing the following steps:

1. Tap Settings and Route Preferences
2. Tap **Route Planning Method** and select your preferred route, for example **Fast** or **Easy**. See Page 86.

5.4 Disabling the speed limit warning

**Issue**: The speed limit warning is signalling even when the actual speed limit is kept.

**Cause**: The speed limit in the digital map data might differ from the actual speed limit of your current location.

**Solution**: Disable the speed warning by performing the following steps:

1. Tap **Settings** and **Warnings**.

2. Tap **Speed Limit** and **Disabled**.
5.5 Keyboard buttons are greyed out

**Issue:** Some keyboard buttons are greyed out and cannot be used.

**Cause:** iGO Navigation app has a smart keyboard for address search, which means that only those buttons are active that can be used to type a name that is available on the map.

**Solution:** Check if you entered the name correctly. If the name is correct, then the address you are looking for is not available in the digital map data.

5.6 The map is hidden behind an image of a junction

**Issue:** The map is not visible because it is hidden behind an image of a junction.

**Cause:** If you are approaching a motorway exit or a complex intersection and the needed information exists, the map is replaced with a 3D view of the junction. The lanes you need to take are displayed with arrows.

**Solution:** If you want to hide the currently displayed junction and return to the Navigation view, tap the picture. To turn off this feature, perform the following steps:

1. Tap **Settings** and **Navigation View**
2. Tap **Junction View**. Now the junction view will not appear again.
